(54) Title: MULTI-LAYER FILM-STRUCTURE, ESPECIALLY MULTI-LAYER FILM LABEL STRUCTURE

(57) Abstract: The invention is concerned with a multi-layer film structure (1), especially film label-structure having a shrinkability, produced preferably in the coextrusion process, with a first (3) and a second (4) outer layer and a third inner layer (2) between the first (3) and second (4) layer, all layers consisting essentially of polystyrene. In order to achieve an advantageous label stock, the invention proposes, that the first (3) and second (4) layer are by weight approximately 50-75 % of the overall weight of the label-structure, that the overall thickness is in the range of 0,5 to at least 4 mils (0,012 to 0,102 mm) and that the first (3) and second (4) layer consist of general, purpose styrenic resin, whereas the third layer (2) is a modified tough polystyrene, such as "K-resin" of Philipps Petroleum Chemicals.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family
